13. Permission to plant and maintain trees at this location provided by:

Name/Title _____ Telephone _____

Signature _____

Tree Planting Details

Attach a one-page drawing (or aerial map, such as Google) for each planting site. Show a north arrow and scale (for example, 1" = 20'). Show:

- each tree or shrub to be planted and its species
- spacing between trees, with enough room for mature width
- trees and shrubs now on or near the planting site
- fences or retaining walls near the planting site
- power lines, underground utilities, and road or utility easements near the planting site
- buildings, streets, parking areas, sidewalks, trails, etc.
- property boundaries, if near the planting site
- streams, bogs, and/or areas subject to flooding or standing water
- snow storage areas

Identify the trees and shrubs you plan to plant:

<u>Species</u> (<i>botanical & common names and cultivar</i>)	<u>Number</u>	<u>Height & Caliper</u>
---	---------------	-----------------------------

Maintenance plan: Proper care is very important, especially in the first three years after planting. List what will be done, by whom, and how often.

Person responsible for caring for trees for three years:

Name/title _____ Telephone _____

Signature _____ Agency _____
